

# Credit Scores (Key)

A credit score is a complex math equation that evaluates your money information. A banker or lender uses your credit score to determine how financially safe you are. A higher credit score helps you get a loan, a credit card, or some other financial service.

Credit Score	Grades in School
990	A
501	F

Note: The three nationwide consumer-reporting companies tend to use scores between 501–990. The FICO score system uses a range of 300–850. **The correct answers are in bold.**

- If you were given these credit scores, which would be the best? Circle your answer.
  - 638
  - 729
  - 890
  - 900**
- If you were given these credit scores, which would be the best? Circle your answer.
  - 625
  - 615
  - 635**
  - 605
- If you were given these credit scores, which would be the best? Circle your answer.
  - 810**
  - 808
  - 807
  - 809
- If you were given these credit scores, which would be the best? Circle your answer.
  - 908
  - 980**
  - 917
  - 971
- If you were given these credit scores, which would be the best? Circle your answer.
  - 645
  - 546
  - 654
  - 655**
- If you were given these credit scores, which would be the best? Circle your answer.
  - 728
  - 782
  - 796**
  - 769
