

Careers and Jobs

What You Learned

1. There is a difference between a career and a job.
2. It's important to know what your personal interests are.
3. You can find a career that is related to your personal interests.

Talk about It

Ask your parents:

- How did you decide which career or job to pursue?
- Which job have you enjoyed the best so far? Why?
- How do you get to pursue your interests at your job?

Do It

- Talk with your parents about your interests. How could those interests one day prepare you for a career or job?
- Go to the library. Ask the librarian where you can find books about careers. Check out a book or two.
- Ask your grandparents about what they've learned about working.

My Notes:
